美語讓孩子的世界更寬廣

我是個喜歡讓小朋友自然學習的家長，從生活中的玩樂開始，讓小朋友發掘自我、探索自我，學習美語也不例外。弋果美語的全外師教學很吸引我，小朋友在全美語的課堂內學習，就像來到「異國」一樣，和美語的距離瞬間拉近，與外師不斷地反覆對話，自然而然地學會句型結構，意外的收穫則是了解各國的異國風情和文化！

弋果教材非常有趣且實用性高，不同顏色代表著不同的學習領域，不論是文法、句型練習、閱讀文章還是英文縮寫，都帶領孩子們更加了解、更加喜歡這個課程！而閱讀課本裡不單只是長篇故事，會搭配有趣生動的圖畫讓孩子更能了解故事意境，看完故事後，孩子會跟外師分享所看到的內容，或是寫下自己的心得，不但可以增進口說能力，還能讓文筆更加流暢！

我們喜歡到各國旅行，有了美語的基礎，到哪裡都不需要擔心如何與外國人溝通。在我看來，Lian最明顯的進步，是從用零碎單字到自然地說出流利的美語，這幾年來的課程也都值得了！讓孩子輕鬆學習、快樂成長，這是為人父母的最大的願望，學美語最重要的不是應付種種考試，而是在需要的時候可以展現它的力量！

The Truth about Tech

According to studies about kids and technology, more than 95 percent of elementary school-aged children spend at least part of everyday using a computer, smart phone or tablet. About 78 percent of teens check their phones every hour, and more than half of them sleep with their phones in case they get a call or message during the night.

The Center for Humane Technology is made up of people who used to work for big tech companies like Google, Facebook and Twitter. Now they want kids to stop using those apps and websites so much. The Center launched a campaign called the Truth about Tech. The goal is to make sure that kids understand how technology affects them so they can make better decisions about how and when they use it. The people behind the campaign also want governments and the tech companies themselves to take steps to protect children.

A Trip to NASA

新竹竹北旗艦校 Intensive 4C Jim Yeh

This summer I participated in the Space Camp with Eagle and it was super fun! I'll tell you now. When I have my feet stepped on America, I only had one feeling in my heart. It was: I'll start my Camp on my own now! We went to the Johnson Space Center in Houston. Inside we saw the team capsule hanging on the wall. It was very cool! We also saw the robot that was for helping the astronauts to do their work in space's zero gravity. There was also the space shuttle's model inside the museum! The coolest thing in the Space Center was the Apollo Program's Mission Control Center! We saw all the old computers used for the missions.

Then was the Space and Rocket Center located in Huntsville. The first thing we saw when we walked into it was the 1:1 space shuttle model shown in the park outside. Then the teachers took us to the lodge to let us put down our luggage. Because it was morning, the next thing we did was go to eat our breakfast. It was like a buffet in the galley. You might think there was only us inside, right? But, inside there were already some people inside. They also had a two-week space camp in America.

The highest thing outside was not the shuttle model. It was the Saturn V Rocket Model. It was 1:1, so it's super high. There was also another rocket model outside. That was the Saturn 1B Rocket. That's not all. Beside the Saturn V, there was also a museum called the Davidson Center for Space Exploration. Inside was the REAL Saturn V rocket! Its length was about 145 meters long.

Then one day we made and launched our rocket! The center has their own rocket launch site, so every team makes a rocket to launch. On the launch day, everyone was excited to launch their rockets! Our team's rocket went all the way up to the sky. Then it fell to the ground. Because it had an engine inside, when we went to pick it, the rocket smelled stinky.

But the most fun thing we did at the center was to have a task. I became the one at Mission Control! My work was to give astronauts commands. Inside the room we used some facilities to control the status of the spacecraft or the astronauts. We had some problems in the mission, but everyone worked together to fix the problem. Everyone participated hard on the mission!

We also experienced the feeling you'll feel on the moon! Because the gravity is different from Earth, it's hard to walk probably.

I have fun at the space camp, but if I didn't come to learn at Eagle, I wouldn't be able to talk with the teachers without a Chinese teacher! I also must thank my parents for paying the money to let me have a super fun experience this summer vacation!
