在弋果看見孩子學習英文的無限潛力

桃園永順分校 Immersion G1 Max & Intensive 1B FiFi 媽媽

在Max和FiFi升上小一與小三時,想為他們找全美語的教學環境,在國小附近尋尋覓覓,有機會接觸到弋果桃園永順分校,聽著班主任Emily認真介紹教學制度與理念時,為弋果專業系統與渾然天成美語環境所深深吸引。相較其他中英文混雜的美語班,下課後只是聽英文CD學習,最後卻沒有得到任何效益,弋果顯得價值非凡。

FiFi一開始進入弋果有些許吃力,在經過一年半的沉浸式教學,外師們活潑互動的上課方式與各式主題應用,像是奧運運動、體驗便利商

店……等等,讓FiFi對美語產生濃厚興趣,甚至連口音都非常標準,口說與字彙飛速進步!弟弟Max一年級就進入浸潤班,適應得非常良好,會主動學習與閱讀,並帶著姐姐FiFi一起進步。回家後,姐弟倆會用美語交談當天的上課内容,彼此分享外師帶給他們的歡樂學習,感覺得出來他們真的很開心,也很享受這樣的學習模式!

謝謝弋果來到桃園,帶給孩子自然學習美語的教學環境與美加同步的教材,讓他們樂在其中,希望他們未來能持續保持對美語的熱情與主動!

Learning by Doing 玩中做,做中學!

太平新光分校主任 Jonathan Tang

過去曾在外商企業任職高階主管,身旁的同事與朋友都很擔心孩子如何在全球人才 競爭中脫穎而出,當然我自己也一樣。起初想幫女兒找個沒有壓力、快樂學習的語文環 境,在接觸到弋果美語後,有一種「沒錯,就是你了」的感覺,所以決定自己加入弋果 行列,希望帶給台中太平區的孩子們國際化且最完善的美語學習。

弋果太平新光分校營造全美語浸透式環境,除了藉由全外師教學,在美加小學教材上的引導外,更導入素養DNA,儲備孩子未來的關鍵能力-包含「溝通力」、「合作力」、「創造力」與「思維力」,同時也涵蓋與孩子們生活經驗相關的主題,將美語應用在藝術、人文、數學、科技與人際關係等領域。來到太平新光分校的孩子們,透過課程學習在聽、說、讀、寫等各層面都有顯著成長,家長也正面回饋其語感、書寫與文法等的持續進步,看到分校內小鷹們與外師間用美語積極的互動與交談,深深感受到孩子們學習力的提升!

要培養下一代全球視野和國際運作的能力,除了美語外,更需要打造創新、合作及 適應等能力,從美語出發進而建立全人發展,要求孩子不偏廢文科或理工科,並做深度 知識的延伸,才能讓孩子們有自信與勇氣了解真實世界。這是我這個弋果園丁對家長及 孩子的承諾!

Meet Maratus Nemo

Maratus nemo, a new species of peacock spider, has a vibrant orange face with white stripes on it. This handsome little guy probably recalls your memory of the timid young clownfish "Nemo" in the Oscar-winning animated feature film.

The Maratus nemo is the latest species and named by arachnologist Joseph Schubert, who believes there are more undiscovered peacock spiders out there. If you observe them under a microscope, their brilliant colors and behaviors appear.

Native only to Australia, the Maratus nemo is also known with its elaborate dance and should have no trouble attracting the ladies.

Student's Work 學生作品

If There Were No Electricity 新竹竹北旗艦校 Intensive 4B Rachel Wu

If there were no electricity, it would be dark and we can't see in the dark. People would only be able to use fire to see in the dark. If there were no electricity, the traffic will be a mess. Electricity is important for our lives. If there were no electricity, I will need to climb sixteen flights of stairs to my house. We wouldn't be able to use telephones to call people. Airplanes wouldn't fly. If we don't have lights, then we could only use the moon or fireflies to read a book or do our homework at night.

If there were no electricity, there would be many things we couldn't do. Machines need electricity, lights need electricity, your iPhone needs electricity, and your lamp needs electricity. Almost everything in the world needs electricity. If there we were no electricity, then there would be no civilization on Earth. Can you imagine if there were no electricity? Everyone you need to use your feet to climb the stairs and you would bump into the walls when it is dark. So we need to save electricity or else you will have to use fire to see the in the dark. Who would want to do that?
